

ACME Corporation — IT Help Desk FAQ

Version 2.1 | Updated: March 2024

Section 1: Account & Access

Q1: How do I reset my password?

If you have forgotten your password or need to reset it, follow these steps:

- Step 1: Navigate to the ACME Self-Service Portal at <https://itsupport.acmecorp.example.com>
- Step 2: Click the **'Forgot Password'** link on the login page.
- Step 3: Enter your registered corporate email address and click **'Send Reset Link'**.
- Step 4: Check your email inbox (and spam/junk folder) for a reset email from noreply@acmecorp.example.com. The link expires in 30 minutes.
- Step 5: Click the link in the email and enter your new password. Passwords must be at least 12 characters and include uppercase, lowercase, a number, and a special character.
- Step 6: Log in to your account using the new password. You will be prompted to set up MFA if not already configured.

If you do not receive the email within 5 minutes, contact the IT Help Desk at ext. 1001 or helpdesk@acmecorp.example.com.

Q2: How do I unlock my Active Directory account?

After 5 consecutive failed login attempts, your account will be locked for 15 minutes automatically. To unlock immediately, call the IT Help Desk at extension 1001 with your employee ID for verification. Alternatively, your account will unlock automatically after 15 minutes of inactivity.

Q3: How do I set up Multi-Factor Authentication (MFA)?

MFA is mandatory for all employees. To set it up:

- Download the Microsoft Authenticator app on your smartphone.
- Log in to the ACME Office 365 portal at <https://portal.acmecorp.example.com>.
- Follow the on-screen prompts to scan the QR code with the Authenticator app.
- Approve the test notification to complete setup.

Section 2: Hardware & Equipment

Q4: How do I request a new laptop or peripheral?

Hardware requests must be submitted through the IT Portal (<https://itsupport.acmecorp.example.com>) under 'New Equipment Request'. Requests require manager approval. Standard delivery time is 5-7 working days. For urgent requests, contact IT Help

Desk directly.

Q5: What do I do if my laptop is slow or unresponsive?

- Restart the laptop — this resolves most performance issues.
 - Check for pending Windows/macOS updates and install them.
 - Close unused applications and browser tabs.
 - Run a virus scan using the pre-installed CrowdStrike Falcon agent.
 - If the issue persists, submit an IT ticket with a description of the problem.
-

Section 3: Software & Applications

Q6: How do I install approved software?

Approved software is available in the Company App Store (Software Center on Windows, Self-Service on macOS). Browse, select, and click Install. No admin password is required. Non-approved software must not be installed without a formal exception request approved by your manager and the IT Security team.

Q7: How do I access company resources from home (VPN)?

Use the Cisco AnyConnect VPN client pre-installed on your laptop. Connect to vpn.acmecorp.example.com using your corporate email and password, then approve the MFA prompt. Disconnect VPN when accessing only internet resources to preserve bandwidth.

Section 4: IT Policies

Q8: What is the Acceptable Use Policy (AUP)?

Company IT resources (laptops, email, internet) are provided for business use. Limited personal use is tolerated but must not interfere with work, consume excessive bandwidth, or involve illegal content. All activity on company devices is subject to monitoring. The full AUP is available on the intranet at <https://intranet.acmecorp.example.com/policies>.

Q9: How should I report a security incident or phishing email?

Forward any suspicious email to security@acmecorp.example.com immediately. Do not click links or download attachments from unknown senders. For active security incidents (ransomware, data breach), call the Security Hotline at ext. 9911 immediately and disconnect your device from the network.
